for **T**rainees

UniTO FAST

is a structured academic certification program for gynecological anatomy created and developed at the University of Turin, Italy.

The **program** has been **tailored for trainees** and is based on an innovative educational model of **female anatomy** leading to the "fast" acquisition of the anatomical knowledge and practical dissection skills on cadaver for surgical application.

It includes **3 building blocks** for pelvic anatomy:

- Reinterpretation of known anatomy
- Simplification of surgical anatomy
- Application of anatomical surgery

The program includes **3 modules**:

- "knowledge" (theory)
- "knowledge as recognition" (practice)
- "knowledge acquisition" (testing)

Presidents:

Chiara Benedetto
Alessandro Vercelli

Director:

Stefano Cosma

AIAD President:

Maurizio Catalani

Tutors:

Stefano Cosma
Domenico Ferraioli
Luca Fuso
Gabriele Lanzo
Leonardo Micheletti

Faculty:

Marina Maria Boido
Massimiliano Mistrangelo
Marco Oderda
Armando Romeo

Technical support:

Vittorio Monasterolo

Director of the Specialty School:

Luca Marozio

Scientific secretariat:

Sabina Rollo
Loredana Salton
Annamaria Tavella

University of Turin

Course venue:

Anatomical Institutes Building
C.so Massimo d' Azeglio 52, Turin (Italy)

1st day
Below
the pelvis

KNOWLEDGE

- Surgical terminology for vulvar cancer treatment
- The Scarpa's triangle

KNOWLEDGE AS RECOGNITION

- Vulvar anatomy
- Inguinofemoral anatomy

KNOWLEDGE ACQUISITION

- "Pictionary"

KNOWLEDGE

- From surgical anatomy to anatomical surgery: planning surgical strategies
- The right stitch for the right anatomical structure
- Going beyond the pelvis

KNOWLEDGE AS RECOGNITION

- Anatomy of the main mono/bi/tri/full-compartmental gynecological procedures
- One stitch, one tissue
- Anatomic knowledge to explore the upper abdomen in gynecologic oncology

KNOWLEDGE ACQUISITION

- "Which came first: the chicken or the egg?"

KNOWLEDGE

- The classical model of pelvic anatomy: spaces and structures
- A fascial reinterpretation of the classical female pelvic surgical anatomy: seeing things from a different angle

KNOWLEDGE AS RECOGNITION

- The classical model of pelvic anatomy: dissection of spaces and structures
- The fascial compartmentalization

KNOWLEDGE ACQUISITION

- "Make the puzzle"

A project of:  In collaboration with: 

Fast

Supported by:     

2nd day
The pelvis

KNOWLEDGE

- The Vascular and Neural compartments: vascular and neural crossroads of the body
- The Parietal and Visceral compartments: suspension and support systems of viscera

KNOWLEDGE AS RECOGNITION

- The Parietal and Vascular compartments: dissection of their anatomical structures
- The Neural and Visceral compartments: dissection of their anatomical structures

KNOWLEDGE ACQUISITION

- "Freaking Shapes"

3rd day
